Professional Profile

Bilingual operations and healthcare-support professional with 10+ years of experience across patient access, customer experience, BPO operations, records management, financial services, public administration, and education. Experienced in regulated-information handling, case and service workflows, customer communication, documentation, escalation support, and operational follow-up in English- and Spanish-speaking environments.

Currently a Customer Service Representative in the Patient Access Center (PAC) operation at Omega Healthcare, serving a healthcare client through Omega Healthcare. Uses Epic and Salesforce and performs an additional After Hours Line function. Targeting healthcare operations, customer experience, customer success, information management, documentation, and operational-improvement roles.

Combines operational discipline, information-governance principles, bilingual communication, and AI-assisted workflow design. Builds practical internal prototypes with human review, documentation, confidentiality, and process continuity in mind.

Core Competencies

Patient access and healthcare operations · Bilingual customer service and customer experience · Customer success and case management · Scheduling, rescheduling, confirmations, and cancellations · After-hours support and escalation communication · Epic EHR and Salesforce CRM workflows · Call documentation and information accuracy · SLA, QA, AHT, ACW, CSAT, and FCR awareness · Regulated-information handling · Operations documentation and knowledge management · Records management and archival description · Information governance and document control · AI-assisted workflow design and internal-tool prototyping · Structured problem solving and continuous improvement · English–Spanish professional communication and translation

Professional Experience

Omega Healthcare — Patient Access Center (PAC) Operation
Customer Service Representative / Patient Access Center and After Hours Line Support *April 2026 – Present · Remote healthcare operations*

- Support a healthcare client through Omega Healthcare across appointment scheduling, rescheduling, confirmations, cancellations, patient messages, and related administrative requests.
- Use Epic and Salesforce to review records, document interactions, manage requests, and support accurate follow-up within established workflows.
- Handle approximately 80 calls per day while maintaining attention to quality, documentation, privacy procedures, and service-level expectations.
- Perform an additional After Hours Line function, including general information, messages to clinical teams, urgent communication with on-call doctors, and doctor-to-doctor connections under established procedures.
- Resolve complex cases, support colleagues in nesting, and develop high-level AI-assisted HTML prototypes for shift-break awareness, call-flow consistency, call documentation, and operational improvement. Prototypes remain subject to internal review and pilot validation.

DS Solutions / Hired Experts — Client: Cordoba Legal Group
Bilingual Operations Specialist *June 2025 – February 2026 · Remote BPO operations*

- Managed customer-lifecycle activities for a U.S.-based debt-resolution operation within quality, efficiency, SLA, and corporate-compliance requirements.
- Investigated complex cases and reviewed legal and operational documentation with attention to accuracy, traceability, and procedural consistency.
- Supported customer communication, case follow-up, documentation, and escalation in a sensitive financial-services environment.
- Designed AI-assisted workflow concepts and internal applications using ChatGPT and Claude to reduce repetitive processing and improve operational consistency.
- Used Notion for structured knowledge management, team references, and operational continuity.

Professional Experience — Continued

Sutherland — Capital One
Bilingual Banking Support Specialist *November 2024 – March 2025 · Remote banking support*

- Provided bilingual support for U.S. banking customers while handling sensitive financial and personal information under established security procedures.
- Assisted with payment structures, billing questions, account information, and customer-service workflows.
- Maintained accurate interaction documentation and applied data-privacy practices.
- Used Google Workspace and spreadsheet workflows for reporting, organization, and operational follow-up; explored AI-assisted spreadsheet automation with human review.

Concentrix / Webhelp — Cigna Healthcare
Customer Success Associate *August 2023 – November 2024 · Healthcare customer operations*

- Delivered bilingual healthcare customer support in a regulated service environment.
- Verified eligibility and reviewed healthcare information involving CPT codes and EPO, HMO, and PPO plan structures.
- Managed medical-billing and patient-access cases while following quality, SLA, privacy, and corporate-compliance procedures.
- Documented interactions accurately, navigated multiple systems, and supported appropriate resolution and escalation.

Foundever — FedEx
Customer Service Representative *May 2023 – July 2023 · Bilingual logistics support*

- Provided bilingual inbound support for shipment tracking, delivery questions, claims, and service issues.
- Investigated cases across customer-service systems and coordinated with internal teams to support timely resolution.
- Applied data-protection procedures when handling customer and shipment information.

Nexa BPO — Porvenir Pensiones y Cesantías
Call Center Representative *February 2023 – March 2023 · Bogotá, Colombia*

- Provided inbound support during a high-demand campaign involving pension funds, severance, and benefits inquiries.
- Explained administrative processes and supported eligibility- and payment-related questions with accuracy and empathy.
- Worked with awareness of AHT, customer satisfaction, quality, and SLA expectations.

Additional Experience

MEDIAPRO TELEVIDEO SAS — Administrative Operations Assistant *August 2021 – May 2022 · Bogotá, Colombia*
Managed operational documents, administrative records, technical data entry, internal logistics, and workflow follow-up using Excel and Microsoft Access.

Fundación Colombia Identitaria — Financial Analyst / Administrative Assistant *August 2020 – May 2021 · Bogotá, Colombia*
Supported financial-market analysis, expense tracking, reporting, administrative coordination, and documentation related to subsidy processes for older adults in vulnerable situations.

Iron Mountain Colombia — Banco de la República — Process Lead / Records Management Technician *December 2018 – June 2019 · Bogotá, Colombia*
Processed approximately 25,000 historical architectural plans and accounting records using archival description, classification, digitization, document preservation, and traceability workflows based on ISAD(G) principles.

Junta de Acción Comunal Luis López de Mesa — English Tutor and Educational Systems Designer *October 2017 – November 2018 · Freelance*
Designed English instruction, educational materials, learning paths, and student-progress systems for A1–B2 learners using Google Classroom, Google Workspace, Excel, and Google Sheets.

Alcaldía Local de Rafael Uribe Uribe — Administrative Technician *June 2015 – December 2016 · Bogotá, Colombia*
Operated public document-management systems, supported administrative research, coordinated subsidy-applicant documentation, and applied archival principles to citizen-service workflows.

Additional Experience — Earlier Roles

Junta de Acción Comunal Luis López de Mesa — Electronics Tutor — Basic and Power Electronics *June 2014 – October 2015 · Freelance*
Delivered technical instruction and created structured learning materials and progress-tracking systems.

C&J Proyectos Topográficos — Chainman II and Technical Operations Assistant *September 2013 – May 2014*
Supported georeferencing and organized CAD files, LiDAR point clouds, orthophotos, survey reports, and photographic archives.

COLTEMPORA S.A. — Social Security / Colpensiones / UGPP — Auxiliary II — Digitization Specialist *June 2013 – September 2013*
Supported classification, digitization, metadata validation, document control, and institutional record migration.

Seguro Social / Colpensiones / UGPP — Sistemas y Computadores SYC S.A. — Operations Assistant — Records Management *March 2012 – December 2012*
Supported classification, digital imaging, organization, delivery, and quality control for social-security records.

Carlos Forero Olaya & Cía. Ltda. — Administrative Assistant and Courier *September 2011 – February 2012*
Supported insurance-policy administration, premium processing, document delivery, client records, and administrative logistics.

Leadership and Community Experience

Junta de Acción Comunal Luis López de Mesa — President *2018 – 2026 · Bogotá, Colombia*
Led community-administration activities, territorial coordination, documentation, communications, stakeholder follow-up, and governance-related processes. Co-founded a community foundation and supported civic and local-development projects.

Selected Projects

Patient Access Operations Tools — In Progress. AI-assisted HTML prototypes for shift-break awareness, call-flow guidance, structured call documentation, and operational consistency in a healthcare contact-center environment. Public descriptions exclude patient data, employer-confidential procedures, and proprietary implementation details.
AI-Assisted Workflow and Knowledge Systems. Personal and operational prototypes combining domain knowledge, LLM assistance, structured documentation, Notion-based knowledge management, spreadsheet workflows, and lightweight web tooling.

Education and Training

Técnico Asistencial en Administración Documental — Servicio Nacional de Aprendizaje (SENA). Training in document management, archival principles, records organization, information systems, and administrative documentation.
Engineering Electronics Studies — Incomplete — Universidad Manuela Beltrán. Two semesters completed.
Production and Pedagogical Use of Video — Six-month course, Servicio Nacional de Aprendizaje (SENA) and Ediciones Paulinas.

Tools and Technical Environment

Healthcare and CRM: Epic EHR, Salesforce CRM, Verint, and workforce-management environments.
Productivity and documentation: Microsoft Excel, Microsoft Access, Google Workspace, Google Forms, Google Classroom, Google Slides, Google Keep, Google Sites, Notion, and document-management workflows.
AI-assisted work: ChatGPT, Codex, Claude, Gemini, DeepSeek, GitHub Copilot, Cursor, Lovable, n8n with AI, Google AI Studio, Perplexity, and Manus AI for research, writing, analysis, prototyping, and workflow design.
Technical and analytical work: formulas, filters, data validation, pivot tables, dashboards, reporting, spreadsheet automation, CAD, LiDAR-related workflows, digital imaging, metadata validation, and archival description.
